Department: ICE

Course Title: Industrial Visit II

Instructor:
Engr. Md. Zahirul Islam
Assistant Professor
Department of ICE
Daffodil International University

Submission Date: 29-04-2026

Introduction

Industrial visits are very important for students because they help connect academic knowledge with practical industry experience. For students in fields like IT, Computer Science, and Media, these visits provide a real-life understanding of how professional environments operate.

As part of our academic program, we visited Deepto TV, one of the well-known television and digital media channels in Bangladesh. Through this visit, we observed how media content is created, managed, and broadcast using modern technologies.

Objectives of the Visit

The main objectives of this visit were:

- To understand how a television channel operates in real life
- To gain knowledge about content production and broadcasting systems
- To explore digital platforms such as OTT services
- To interact with professionals working in media and technology
- To learn about career opportunities in media and IT sectors

About the Company

Deepto TV is a private Bengali satellite television channel operated by Kazi Media Limited, which is part of the Kazi Farms Group. It officially started broadcasting on November 18, 2015, and has gained popularity in Bangladesh over time.

The channel mainly focuses on:

- Drama serials
- Reality and lifestyle programs
- News and documentaries
- Foreign content, especially Turkish dramas

Activities During the Visit

Welcome & Introductory Session:
The visit began with a formal welcome session where the company representatives introduced their organization, mission, and contribution to the media industry in Bangladesh.

Overview of Broadcasting System:
We received a clear explanation of how broadcasting works, including:

- Content production and editing process
- Signal transmission through satellite and cable
- Program scheduling and content management

Studio Tour & Production Workflow

During the studio tour, we observed:

- Shooting environments for TV programs
- Professional equipment like cameras, lighting, and audio systems
- Live broadcast control rooms

This helped us understand how different teams collaborate to produce a complete television program.

Interaction with Professionals

We had the opportunity to observe different departments such as:

- Technical team handling system operations
- Marketing team dealing with clients
- Support team managing audience queries

This gave us a practical idea about teamwork and coordination within an organization.

Technologies Observed

We explored various technologies used in broadcasting and digital media:

- Broadcasting tools: Cameras, sound systems, lighting
- Editing software for post-production
- Streaming technology for OTT platforms
- Networking systems for signal transmission
- Content Management Systems (CMS)

Key Technical Specifications

- Broadcast format: 1080i HDTV (converted to SD for some devices)
- Satellite: Bangabandhu-1
- Software tools include: CasparCG, Blender, Inkscape, KDEnlive
- Operating system: Ubuntu Linux
- OTT Platform: Deepto Play (supports multiple devices)

Learning Outcomes

From this visit, we gained:

- Practical knowledge about media production and broadcasting
- Understanding of digital transformation in media
- Experience of teamwork in a professional environment
- Awareness of job opportunities in media and IT
- Motivation to improve both technical and creative skills

Challenges Discussed

Some challenges discussed by the company were:

- Shift from traditional TV to digital platforms
- Strong competition among channels and OTT services
- Content piracy issues
- Maintaining content quality
- Engaging audiences effectively

Conclusion

The visit to Deepto TV was very informative and aligned with our academic goals. It provided a complete overview of how a modern media organization operates, from production to broadcasting and digital streaming. The experience was both educational and inspiring, showing the combination of technology and creativity in the media industry.

Recommendations

Suggestions for the industry:

- Provide internship opportunities for students
- Arrange workshops and training programs
- Build stronger collaboration with universities
- Allow students to participate in basic production tasks
